NPC Secure Computing Program for Advisor Networks

Preferred Pricing for IIAC Members

Offer your advisors a cost effective, secure and managed computing solution to ensure the protection of their business and the sensitive information they manage.

NPC Smarter Computing

IIACACCVM
INVESTMENT INDUSTRY ASSOCIATION OF CANADA
ASSOCIATION CANADIENNE DU COMMERCE DES VALEURS MOBILIÈRES

This program will ensure the protection of your advisors when they manage sensitive client information, protect your brand and revenue, eliminate significant compliance and incident remediation costs, and provide a value-added benefit to your Advisor relationship.

For IIAC members, NPC will design and manage a program for your advisors, whether they are your staff, captive independents, or multi-product independent agents. You can offer them a safe, secure computing solution with an attractive discount offering to ensure the protection of their business and the sensitive information they handle on your behalf.

Program Benefits

- Advisor computers will be encrypted to protect client information in the case of loss, theft or unauthorized intrusion
- Lost, stolen or defective systems are replaced with data and applications restored
- Advisor data will be backed up daily, remotely and securely to Canadian ISO 27001 data centres to ensure retention of client information in the case of loss, theft, fire, virus, hardware failure or human error
- Advisors will have unlimited, no charge access to 24/7/365 bilingual technical support featuring voice, chat, email and advanced remote support and diagnostics
- Advisor systems will be continuously monitored for security, intrusion, malware and backup compliance
- Advisor systems will have powerful and professionally managed anti-virus protection to protect from ransomware, Business Email Compromise (BEC) attacks, and other cyber threats
- Advisor systems will feature the latest versions of operating system, Office Suite and system utilities like Java and Adobe that will be professionally patch-managed and up-to-date
- Advisors will enjoy significantly greater endpoint performance, productivity and support services

Compliance Benefits

- NPC systems exceed regulatory and association requirements to protect client data
- Your organization and/or the Advisor can order an effective "legal hold" on a specific system
- Deleted files up to 90 days old and alternate versions of files will be available for retrieval, including entire data backup images of a computer for audit purposes. Your organization and the Advisor will have greater control and access to Advisor information in the case of a legal dispute, regulatory, compliance, security or financial audit issues
- If permitted in your Advisor agreement, you will have the ability to confirm the encryption status, security and backup compliance of Advisors connected to your organization's network
- NPC eliminates your organization's and the Advisor's liability for data loss from endpoint computing through endpoint cybersecurity insurance
- With NPC, there will in most cases be no need to invoke the brand damaging requirement of advising clients that a lost or stolen device contained or may have contained their personal financial information, or that a cyber-threat may have been successful

Additional Benefits

- Preferred Pricing Program
- Monthly NPC Security Status Reports
- Secured by NPC Badge Program
- NPC Security Alerts
- Educational Training and Webinars

NPC carries multi-million dollar Privacy Breach Remediation Insurance for its clients if an NPC secure managed computer ever failed to protect them.
